

1. `@app.route('/getEula', methods=['POST'])`

Upload one or more EULA with PDF or MS Word format. The EULA will be parsed into clauses and predicted. The prediction along with the clause would be saved in MongoDB.

The returned value is the document ID as key with the document name as value.

}
```

2. @app.route('/getResult', methods=['POST'])

Use the returned document ID as value, “Doc_Id” as key to send request to get the predicted results in MongoDB.

```

3. @app.route('/evaluateClause', methods=['POST'])

Use “_id” of each clause to change the predicted results stored in MongoDB. Use the retrain to decide whether to retrain the model with user verified clauses.
